

Freshport Asia Awarded “Best Perishables Shipping & Logistics Provider Thailand 2018”

Freshport Asia, Thailand’s cool care specialists in conjunction with BFS Cargo, were recently awarded as the “Best Perishables Shipping & Logistics Provider Thailand 2018” by Acquisition International.

The award showcases Freshport Asia’s commitment to helping Thai fresh produce exporters stay competitive and reach overseas markets. Over the past 10 years, the company has handled over 6000 tonnes of cargo, and both educated and assisted shippers in eliminating unnecessary polystyrene in shipments, proving their responsibility to environmentally friendly shipping standards.

Mr. Chris Catto-Smith, Freshport Asia’s Supply Chain Consulting & Solution Development Manager, said: “I’m so incredibly proud of my airport Freshport team led by Chris Reichert. The award showcases our commitment to improving the handling of temperature sensitive cargo in Thailand. Our companies impeccable record of zero claims or losses is a testament to the hard work the team brings to the table every day. I’m confident in the products and services we provide help to not only reduce shipping costs for temperature-controlled airfreight, but we also help deliver the highest product quality and shelf life at destination. Thanks also must be given to Bangkok Flight Services and all the airlines, shippers, modern trade retailers and freight forwarders who have supported us on this journey.”

Freshport Asia is a leading logistics consultancy company specializing in cool chain. Our core business is operating a specialized airfreight handling service for perishable goods on behalf of BFS Cargo.
